100,000-user latency fairness after the fanout change
Every connected user
Slowest 1% of users
Users at or below latency (%)
Each user’s p99 send-to-receive latency (ms)
Previous Rust trial 1
New Rust trial 1
New Rust trial 2
Previous Rust trial 2
400,000 private probes/sec · 30 seconds/run · 120 samples per user · 2 fresh runs/build
Includes client scheduling and room batching. Every user is retained; this is not a population-wide packet percentile.
